@SercanOkutucu

Dear Esteemed Readers,

It is with great pleasure and a profound sense of accomplishment that I introduce you to the inaugural issue of *Advances in Cardiac Research*. As the Editor-in-Chief of this young and dynamic journal, I am delighted to present this milestone publication, marking the beginning of an exhilarating journey dedicated to advancing the understanding of cardiac diseases and their management.

Cardiovascular health remains a significant challenge worldwide, and our mission with *Advances in Cardiac Research* is to provide a scholarly platform that reflects the energy and innovation of the next generation of researchers, clinicians, and healthcare professionals. We aim to foster collaboration, knowledge exchange, and groundbreaking insights to drive transformative advancements in the field of cardiology.

In this inaugural issue, we have meticulously curated a comprehensive selection of original research articles, comprehensive reviews, intriguing case reports, and thought-provoking letters, spanning the vast spectrum of cardiovascular health. These contributions not only reflect the breadth and depth of our field, but they also highlight the vibrant and diverse perspectives of the emerging scientific community.

One of the distinguishing features of *Advances in Cardiac Research* is its potential for indexing in respected platforms, which ensures that the impactful research published in our journal reaches a wide audience, influencing and shaping the future of cardiology. Our aspiration is to position this journal as a leading source of innovative research, contributing to the global advancement of cardiovascular health.

Furthermore, I am excited to announce that our upcoming issues will feature special sections such as the "Cardiac Spotlight," which will shed light on notable advancements and breakthroughs in the field. We will also introduce "Flow Focus," providing a platform for case discussions and critical analysis. Additionally, we have many new innovative corners planned for the subsequent issues, aiming to explore emerging trends and cutting-edge technologies in cardiac research.

Our distinguished deputy editors, executive editors, associate editors, and all editorial board, comprising esteemed experts from diverse subspecialties within cardiology, has

played a pivotal role in ensuring the rigorous review and selection of each manuscript. Their expertise and commitment to excellence have helped shape this inaugural issue into a testament of scholarly rigor and academic merit.

Advances in Cardiac Research upholds the highest standards of scientific integrity through a stringent peer-review process. We owe a debt of gratitude to our dedicated reviewers who have generously shared their expertise and provided valuable feedback, contributing to the refinement and enhancement of the manuscripts published in this issue.

As an open-access journal, we believe in the principle of universal access to knowledge. All articles published in Advances in Cardiac Research are freely available to researchers, practitioners, and the public, without any subscription barriers. This open access policy enables the unrestricted dissemination of research findings, promoting global collaboration and enabling individuals from all corners of the world to benefit from the latest advancements in cardiology.

We are deeply committed to upholding the highest ethical standards in research and publication. Our journal strictly adheres to internationally recognized ethical guidelines, including those outlined by the Committee on Publication Ethics (COPE). Transparency, scientific rigor, and integrity are paramount in all aspects of the publication process.

On behalf of the entire editorial team, I extend my deepest gratitude to the authors who have entrusted us with their valuable research. Your dedication, expertise, and tireless efforts have contributed immensely to the success of this inaugural issue. I also express my sincere appreciation to our reviewers for their invaluable contributions in evaluating the manuscripts with utmost professionalism and providing constructive feedback.

As we embark on this journey together, I invite you to immerse yourselves in the wealth of knowledge presented in this inaugural issue. Let us seize this opportunity to engage in robust discussions, forge collaborations, and collectively drive forward the frontiers of cardiac research and clinical practice.

I extend my warmest thanks to our esteemed readers for their support, and I encourage you to join us in this remarkable endeavor. Together, let us navigate the ever-evolving landscape of cardiology, with the shared vision of

advancing cardiovascular health and improving the lives of countless individuals around the world.

With great anticipation and excitement for the future,
Sercan Okutucu, MD
Editor-in-Chief, Advances in Cardiac Research

Now, we would like to give space for our esteemed executive editors, associate editors, deputy editors, and associate editors to share their targets, thoughts, and feelings for the future of Advances in Cardiac Research. Each of these dedicated individuals brings a wealth of expertise and a unique perspective to our journal. Their contributions have been instrumental in shaping this inaugural issue and will continue to drive its success.

Let us hear comments from our editors, who have been actively involved in the development of the journal and have provided valuable guidance and leadership throughout the process. Their vision and dedication will undoubtedly steer the future direction of Advances in Cardiac Research.

COMMENTS

“Advances in Cardiac Research has been established with great enthusiasm and aims to make a mark in the scientific world in the near future with publications of high scientific value.

Advances in Cardiac Research also aims to be a school for working together, learning together and teaching together. We are ready to set off with the first issue for new horizons.”

Alper Karakus, MD
Associate Professor of Cardiology
Deputy Editor, Advances in Cardiac Research

“It is our great honor and privilege to announce the first issue of our journal. Advanced cardiac research is a new established and promising journal in the field of cardiovascular disorders. We aim to publish your papers with high academic content including original articles, case reports, images and letters to the editor. Advanced Cardiac Research will enable self-expression of all research around the globe in an unbiased scientific publisher. We will be happy to welcome you in our new journal which will soon be indexed in well-established international indexes.”

Ahmet Karagoz, MD, FSCAI
Professor of Cardiology
Executive Editor, Advances in Cardiac Research

“The necessity of constantly following the literature in order to follow the rapid developments in the field of cardiology and to conduct new research projects creates a need for the publication of new journals. Advances in Cardiac Research journal was established to respond to this requirement. As an executive editor, my expectation from this journal is that it will receive intense interest from authors who will make a real contribution to the cardiology literature, and this interest will contribute to the indexing of our journal by both national and international indexes in the near future.

I think that the fact that our journal has a relevant and strong editorial board in the national and international context will contribute to rapid progress and this is a great advantage for us.”

Metin Oksul, MD
Executive Editor, Advances in Cardiac Research

“Our primary goal is to have our journal indexed international database and recognized on the scientific platform as soon as possible. This journal, which will offer young researchers the opportunity for academic advancement, will also provide perspectives beyond the horizon, apart from academic advancement. Advances in Cardiac Research will soon become an influential, acceptable, scientifically respected, and reliable journal. We will work hard to fulfill our responsibility duly and fairly in this journal.”

Serkan Asil, MD
Associate Professor of Cardiology
Executive Editor, Advances in Cardiac Research

“The knowledge in the Cardiology field is expanding exponentially and there is an unmet need between the number of produced articles and scientific journals. “Advances in Cardiac Research” is a new promising journal with an international prestigious board and scientific committee members. I am honored to be a part of the editorial board and will be pleased to help the journal achieve its goals.

Advances in Cardiac Research journal welcomes all manuscripts from bench to bedside and awaiting you to submit your handcraft articles. We hope to be SCI-indexed at the earliest and compete with the high-ranked journals. We will be pleased to see you among us with your prestigious papers.

Join us and don't lose the chance of being a part of this inspiring scientific journey.”

Yusuf Ziya Sener, MD, MSc, FHFA
Executive Editor, Advances in Cardiac Research

“Dear Esteemed Colleagues and Readers,

We are thrilled to announce the launch of our newly established scientific journal, *Advances in Cardiac Research*, dedicated to the field of cardiovascular diseases. Our publication aims to be a platform for researchers, clinicians, and professionals to share their latest findings, insights, and innovations in the field. Our team of expert editors and reviewers is committed to ensuring the highest quality of articles that meet the rigorous standards of scientific research. We welcome submissions from all areas of cardiovascular research, from basic science to clinical trials and translational research. Our goal is to showcase cutting-edge research worldwide and provide a platform for collaboration and exchanging ideas.

At *Advances in Cardiac Research*, we understand the challenges and complexities of cardiovascular research, but we want to assure our contributors that their efforts will not go unnoticed. We believe that every article has the potential to make a significant impact and contribute to the advancement of cardiovascular research. Our goal is to provide a supportive and encouraging environment for our contributors to showcase their work.

We want to thank our readers for their interest in our journal. We hope you will find our publication informative, inspiring, and thought-provoking. We look forward to hearing your feedback and submissions for continuing to grow and evolve as a publication.”

Ali Nazmi Calik, MD, FESC

Associate Professor of Cardiology

Associate Editor, *Advances in Cardiac Research*

Cardiovascular diseases are the leading cause of death worldwide. Therefore it is of crucial importance for us cardiologists to be up to date in regard to novel scientific developments. With the advances in medical research field, the number of scientific studies have been on the rise. We are in need for open-access, high quality journals which can provide the young scientists opportunity to publish their works, hence motivate and encourage them for further research. We believe that our promising, dynamic, open-access journal

“*Advances in Cardiac Research*” will contribute to compensate this need with its professional, international editorial board members and meticulously selected publications.

Advances in Cardiac Research aims to be among top rank journals with high scientific quality and reach a level of being SCI-indexed at the nearest future possible. Therefore we encourage our colleagues to submit their work and to be a part of this young, scientific family.

Esra Kaya, MD, PhD

Associate Editor, *Advances in Cardiac Research*

“Dear Esteemed Cardiology Researchers,

We are excited to introduce our new cardiology journal, dedicated to advancing the field through rigorous research and insightful discourse. With breakthroughs in diagnostics, therapeutics, and prevention strategies, we aim to highlight the significance and impact of your work. Join our inclusive scientific community, publish with us, and contribute to collective knowledge, patient care, and global scientific progress.

Our journal stands out with an esteemed editorial board ensuring meticulous peer review and adherence to rigorous editorial standards. As an open-access journal, we provide unrestricted access to your research, eliminating barriers to knowledge and elevating cardiovascular care worldwide. We welcome original research, reviews, case reports, and editorials across diverse cardiology disciplines.

Join our passionate community of researchers dedicated to advancing cardiology. Submit your groundbreaking research, receive constructive feedback, and let your findings shape the future of cardiovascular medicine.”

Ismail Polat Canbolat, MD

Associate Professor of Cardiology

Associate Editor, *Advances in Cardiac Research*

“It is a great pleasure to announce first volume of Advances in Cardiac Research journal. Also, I am very happy to be part of this amazing team as editorial board. There are lots of unmet needs in cardiology fields and one of them is long decision duration of journals. While we increase the quality of Advances in Cardiac Research journal, we will try to get final decision in timely manner. To boost the journal, we need you as author, reviewer and so on. Together we will achieve to make Advances in Cardiac Research journal indexed in SCI/SCI-E.

We welcome your articles in a wide spectrum from clinical trials to animal studies. Please do not hesitate to contact for your questions and projects. The journal is inclusive and collaborative to all scientists.

Together stronger...”

Umit Yasar Sinan, MD

Associate Professor of Cardiology

Associate Editor, Advances in Cardiac Research
